

# Richard A. Eustis, FCSI

*“In recognition of your continuous service to the Institute through your notable performance at the Chapter, Region and Institute levels, your sustained involvement in professional education, and outstanding participation and leadership while service on the Institute Board and Committees, you are advanced to Fellowship in the Institute on this 22nd day of June, 1986.”  
Los Angeles, California*

RICHARD A. EUSTIS was born in 1932 in Strong, Maine. After graduation from Strong High School, he entered the University of Maine, graduating in 1955 with a B.S. degree in Civil Engineering. Later that year, he enlisted in the U.S. Army serving nearly two years in Germany with the 2nd Armored Division. He returned with the Division to Fort Hood, Texas where he spent eight months training new recruits.

Following his military service, Eustis was employed by the University of Maine as an Engineering Aide. Over the next several years he received several promotions within the department eventually holding the title, Director of Engineering Services.

In 1968, the three campus University of Maine was merged with the five campus State College system into a new University of Maine System having seven campuses. Eustis joined the new University System administration and became responsible for all capital construction undertaken at any of the seven campuses.

In 1970, Eustis was introduced to CSI and immediately saw the benefits of CSI's formats and recommended procedures. Within a few months he had established a policy that all Project Manuals prepared for University projects would be done in conformance with CSI formats.

Soon after joining CSI, Eustis became active in the Maine Chapter becoming a Chapter Director in 1972. In 1975 he was elected Chapter President. He later served a two year term as Region Treasurer followed by a two year term as Region Technical Chairman.

Eustis chaired a reorganized Institute Technical Committee in 1982 and 1983. This was immediately followed by a three year term as Institute Director representing the Northwest Region. During this same time period, Eustis was also active in the Association of High Education Facilities Officers (APPA) holding several Region Offices including Region President. He also helped found the North New England Chapter of APPA and served as its first President.
